Genome Research

Molecule of DNA

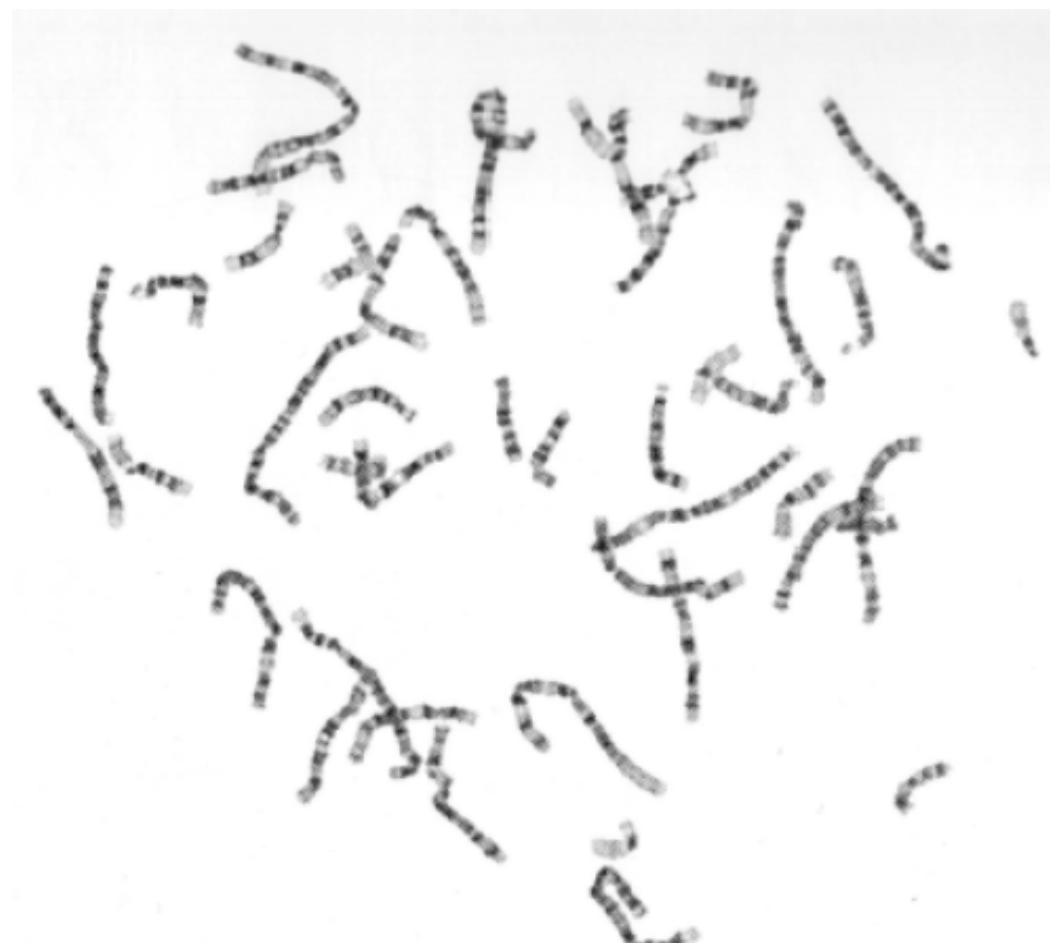

6 Feet of
DNA in
each Cell

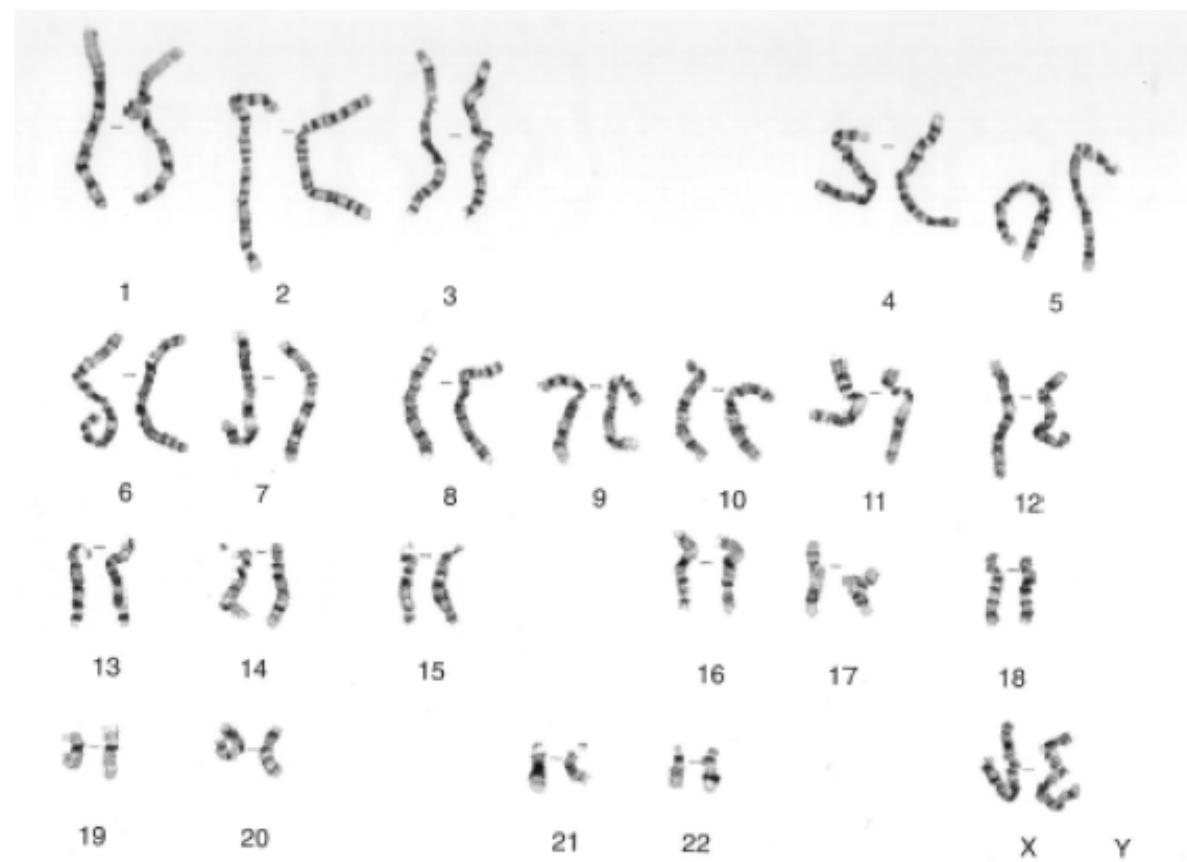

Chromosome

- One huge molecule of DNA
- 100s – 1000s of genes on each
- Visible under a regular microscope
- To be big enough to see, a change must be 4 million bases in size or greater ($\geq 4\text{Mb}$)
 - Roughly the size of a band on the chromosome

Chromosomes

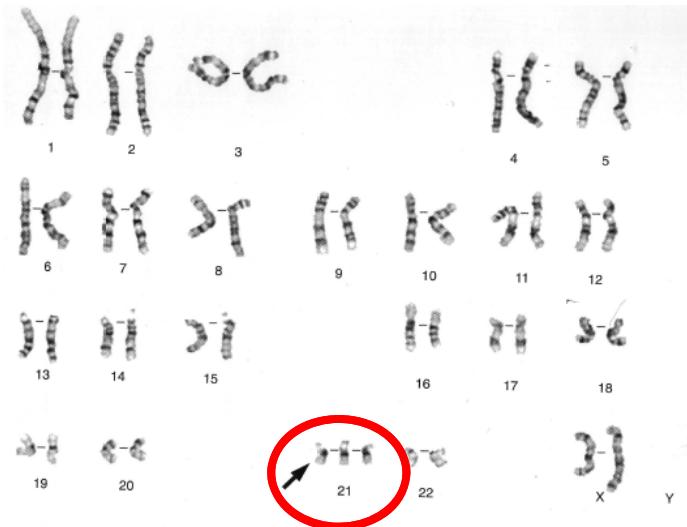

46,XX

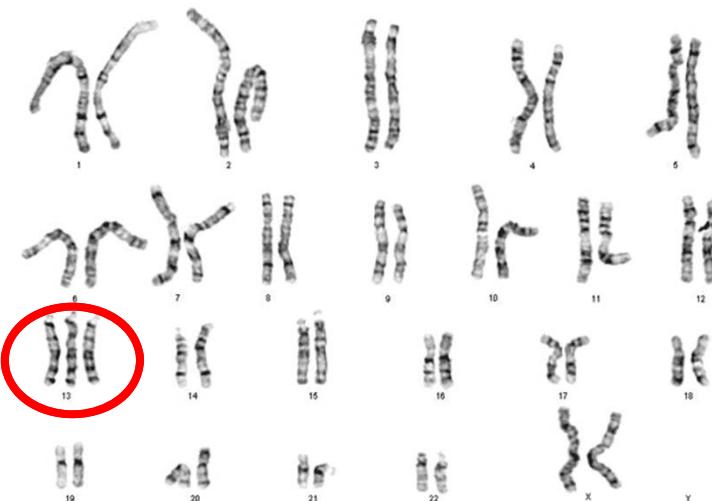

46,XY

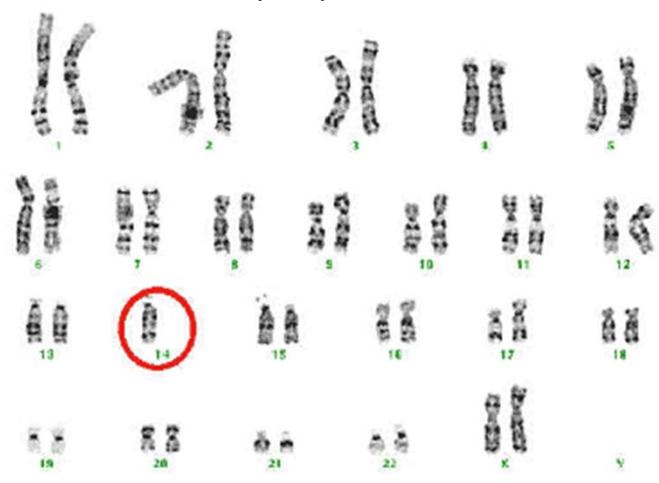

47,XX,+21

47,XX,+13

45,XX,-14

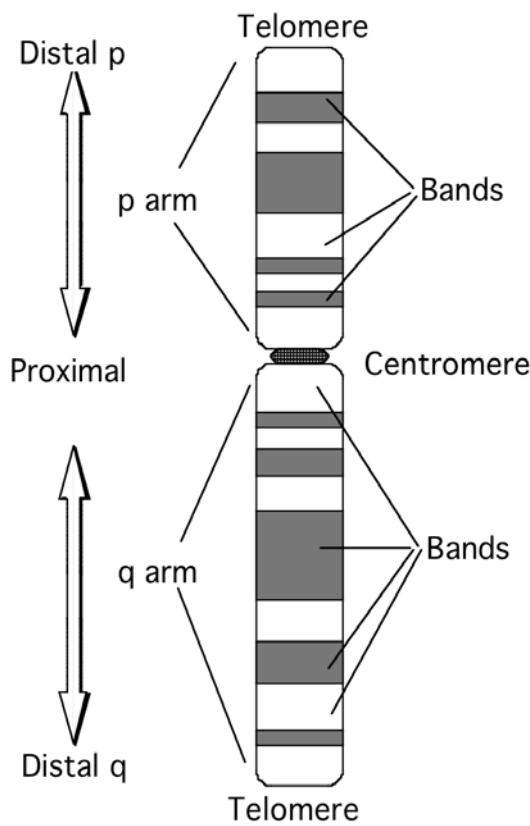

45,XX,-14

Chromosomes

46,XY,del(5)p

45,XX,t(14;21) or 45,XX,rob(14;21)

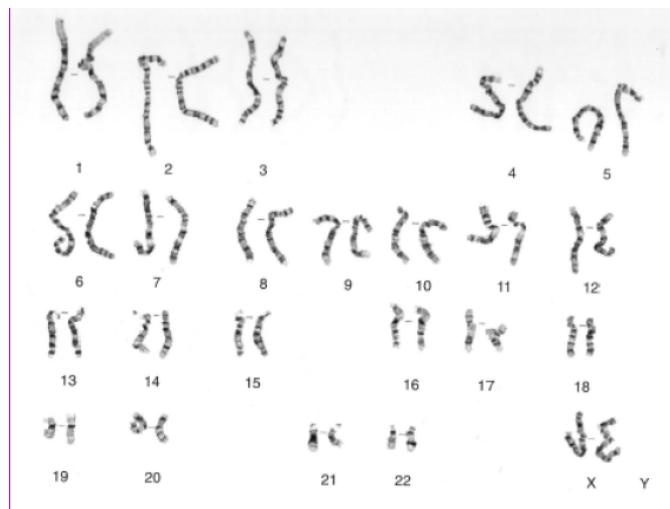

69,XXX

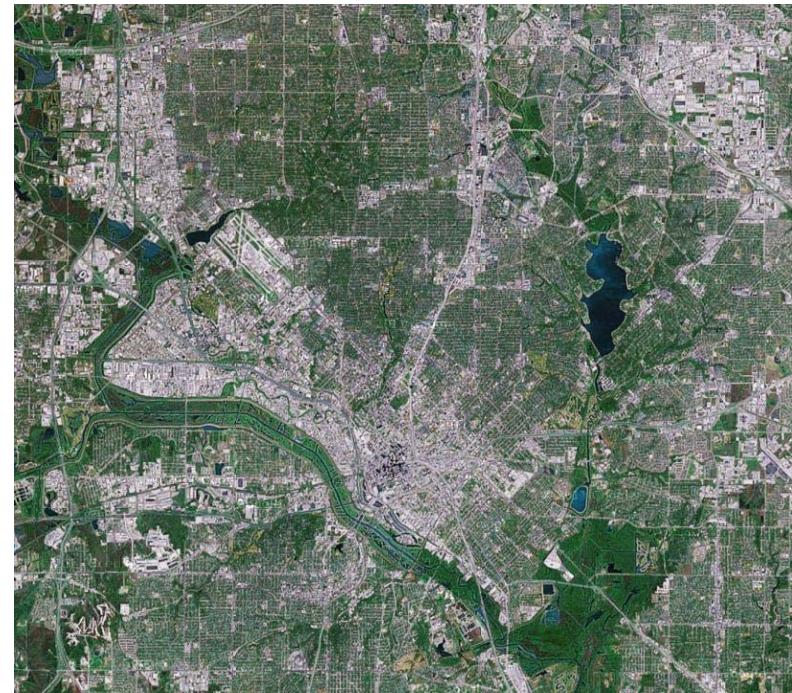

Airplane Analogy

Looking at the genetic material like this

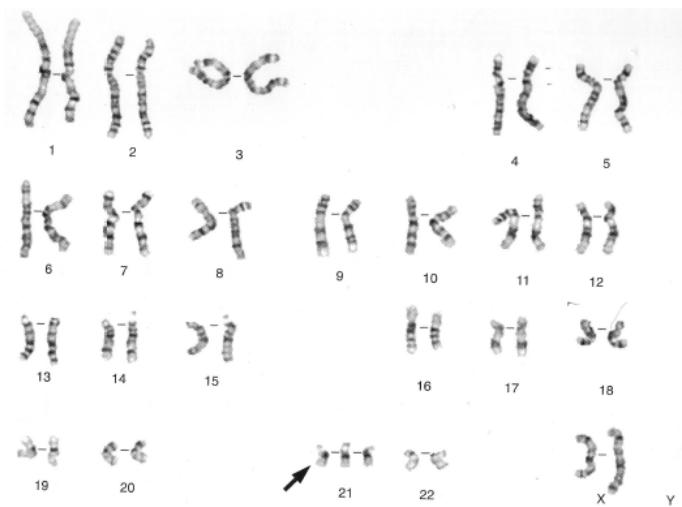

Looking at a city like this

=

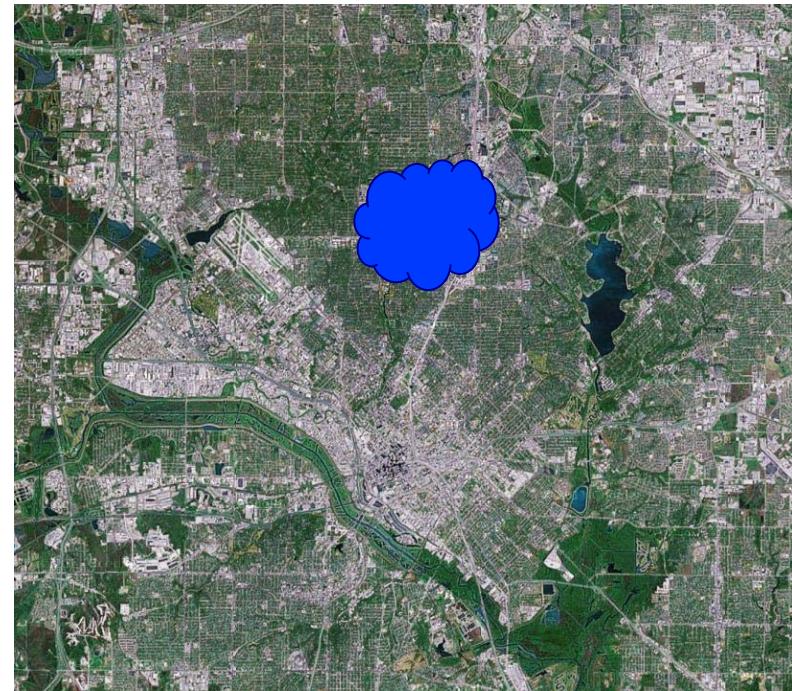

From an Airplane

Having an extra chromosome

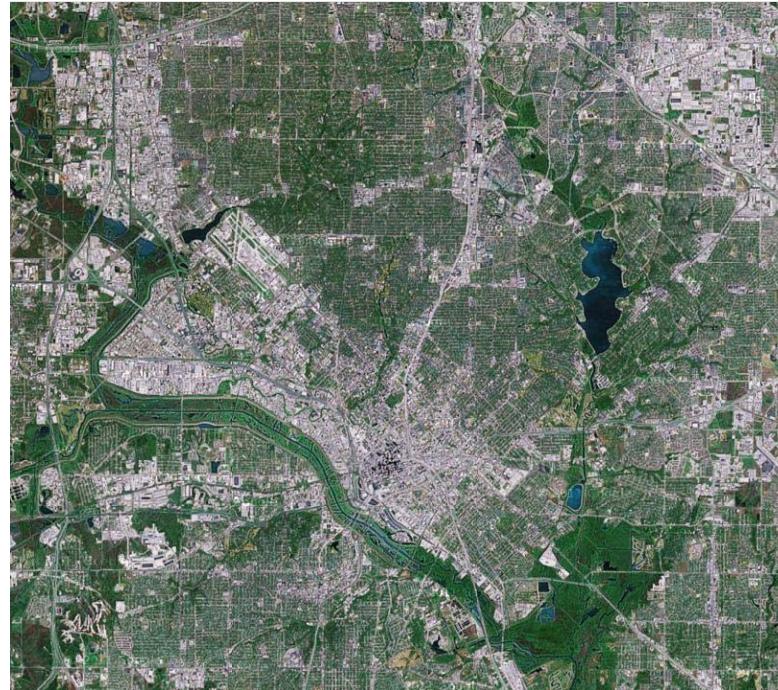

Adding a lake

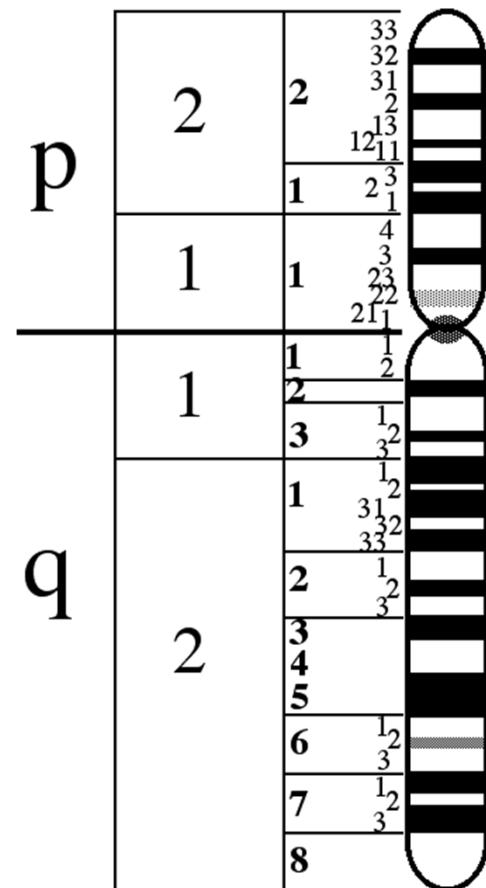

=

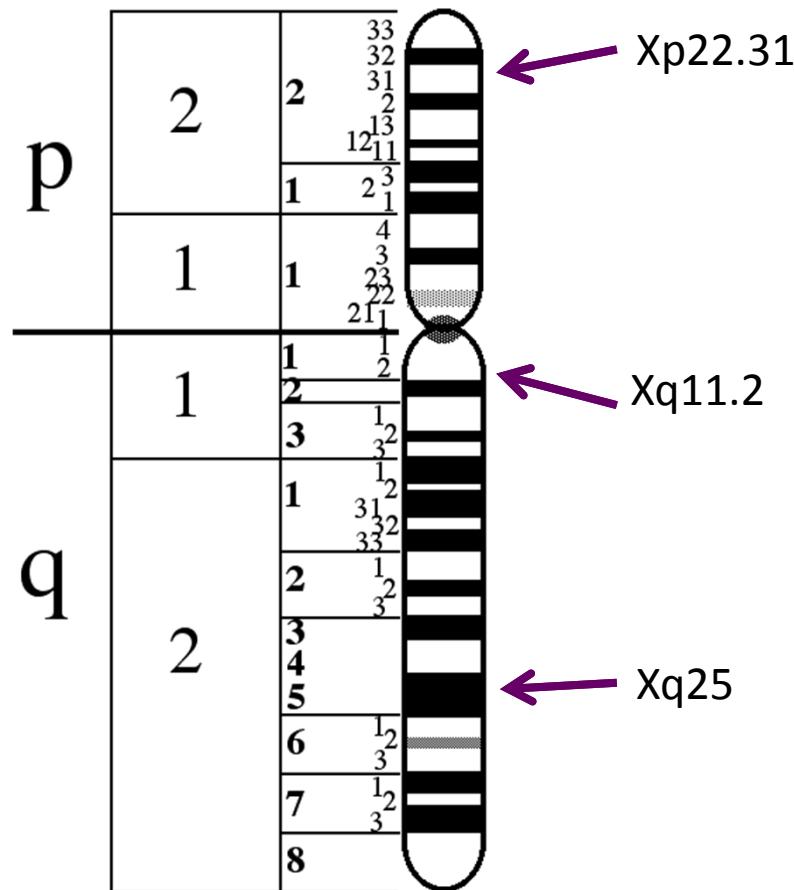

What about a particular address?

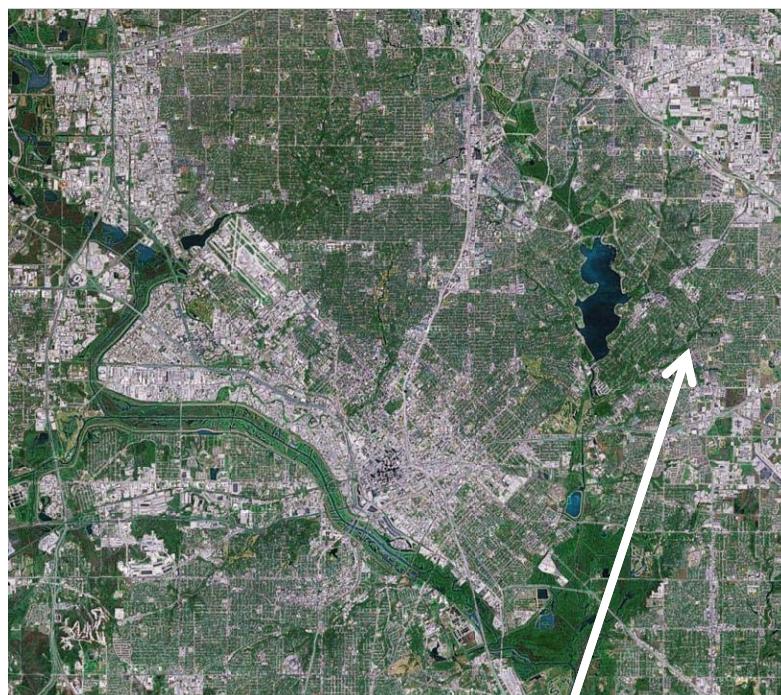

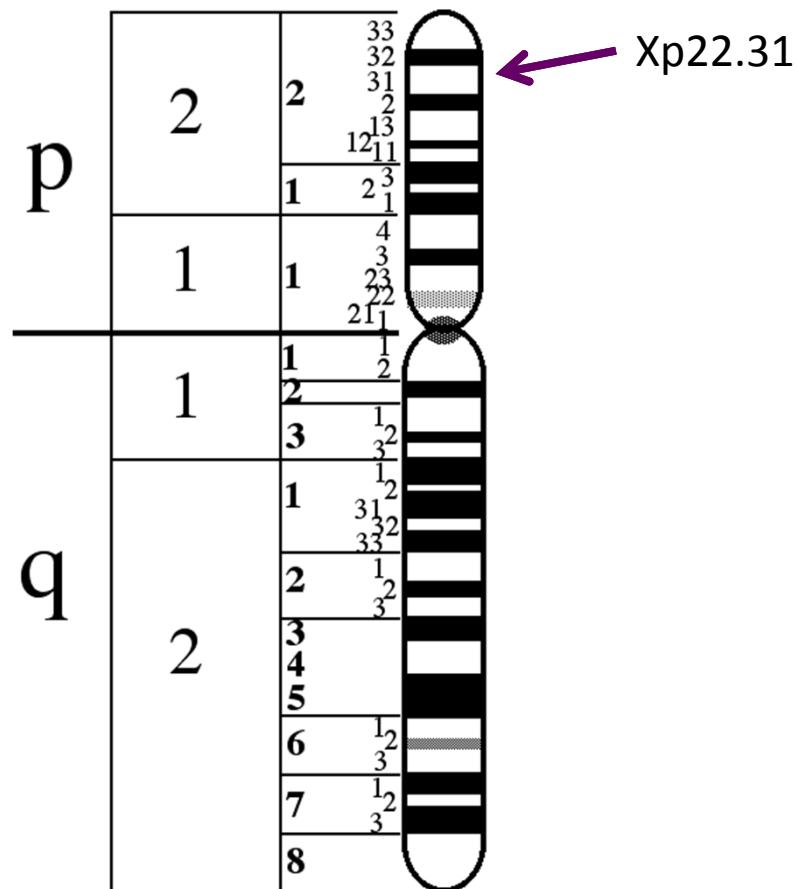

Chromosomes

Chromosomes

9702 Vinewood

What is the correct reading?

22q11.21

- A) Twenty-two q eleven point twenty one
- B) Two two q one one point two one
- C) Twenty-two q one one point two one
- D) Two two q eleven point twenty one

What is the correct reading?

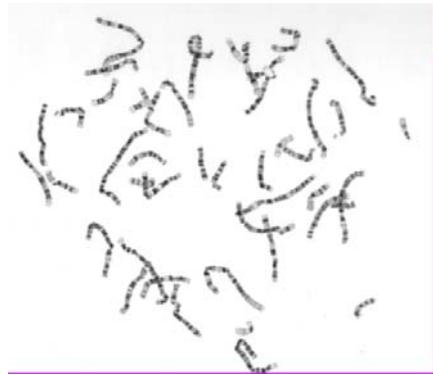

22q11.21

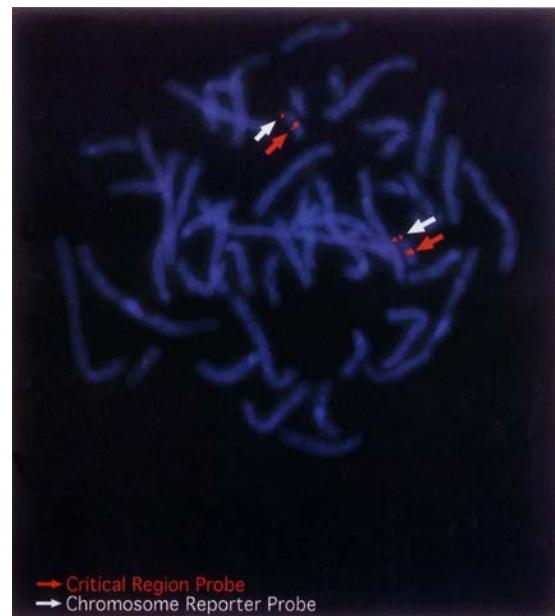

- A) Twenty-two q eleven point twenty one
- B) Two two q one one point two one
- Twenty-two q one one point two one**
- D) Two two q eleven point twenty one

FISH

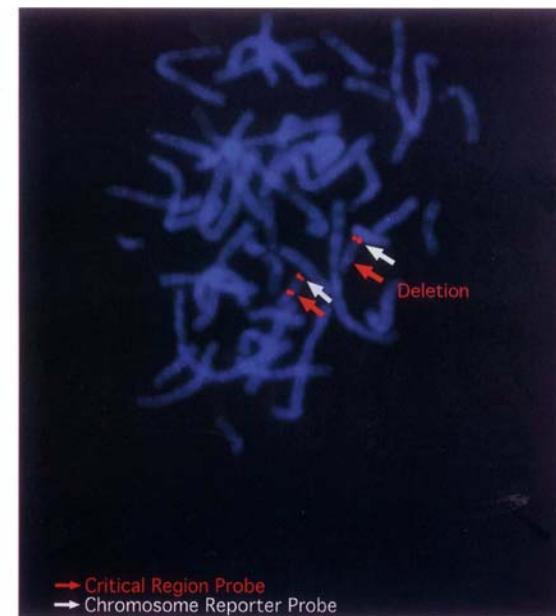

- Will tell you what is going on at a particular address
- Won't tell you what is going on anywhere else.
- Limited usefulness these days as a first-line test
 - You will see it less and less over time
 - Used as confirmation in microarray testing

FISH

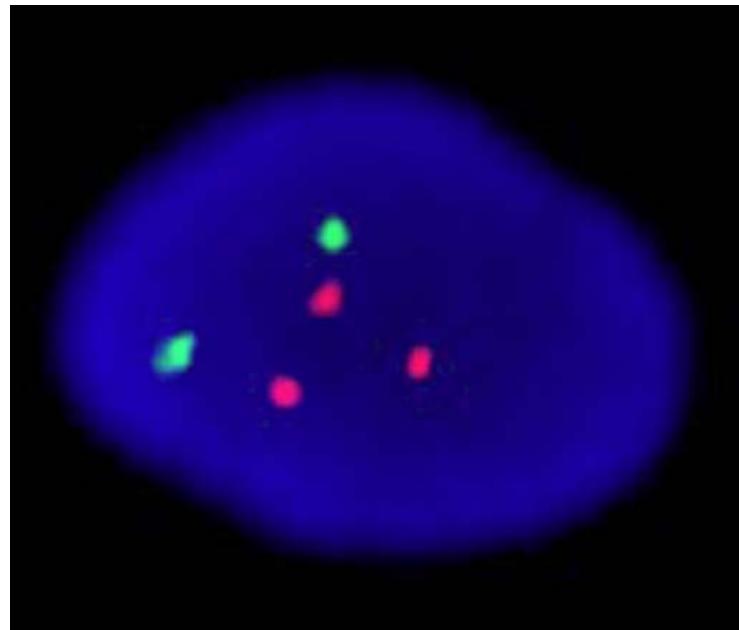

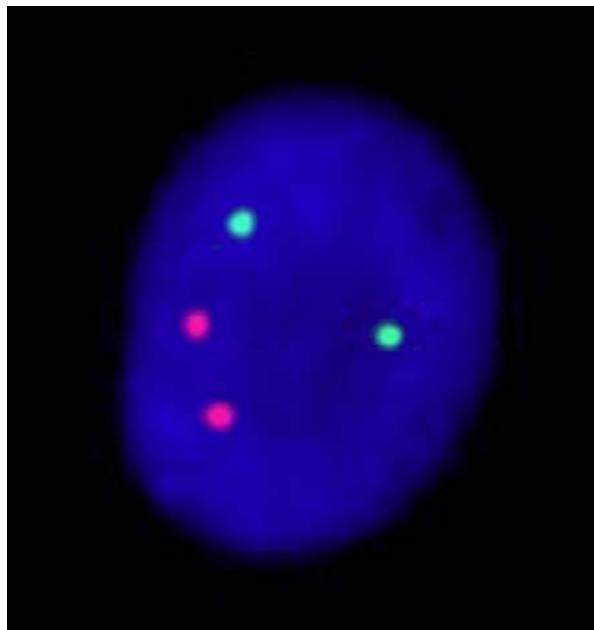

46,XX,ish(22)(q11.2)

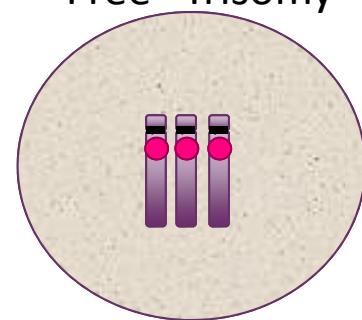

46,XX,ish del(22)(q11.2q11.2)

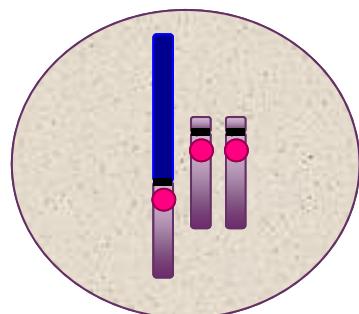

Interphase FISH

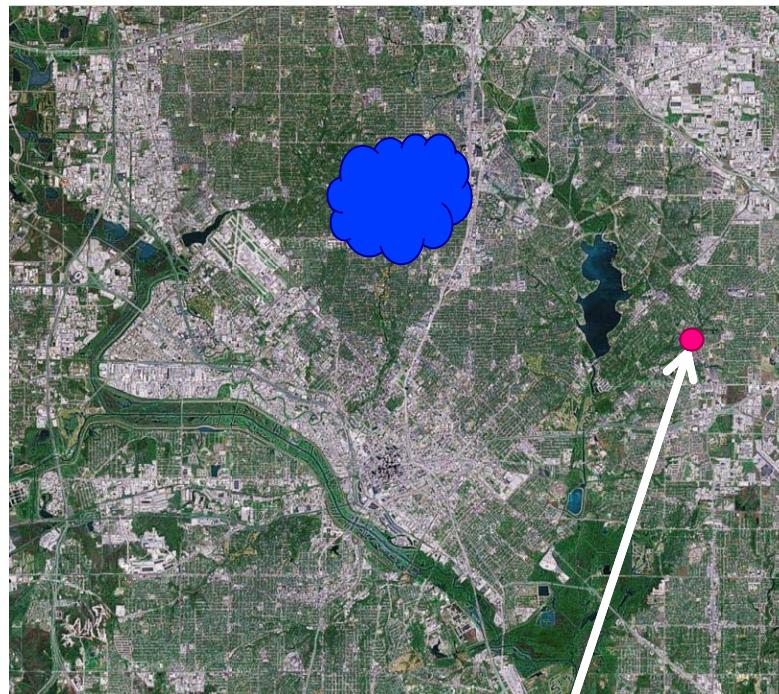

“Free” Trisomy

Translocation Trisomy

Missing the Lake

9702 Vinewood

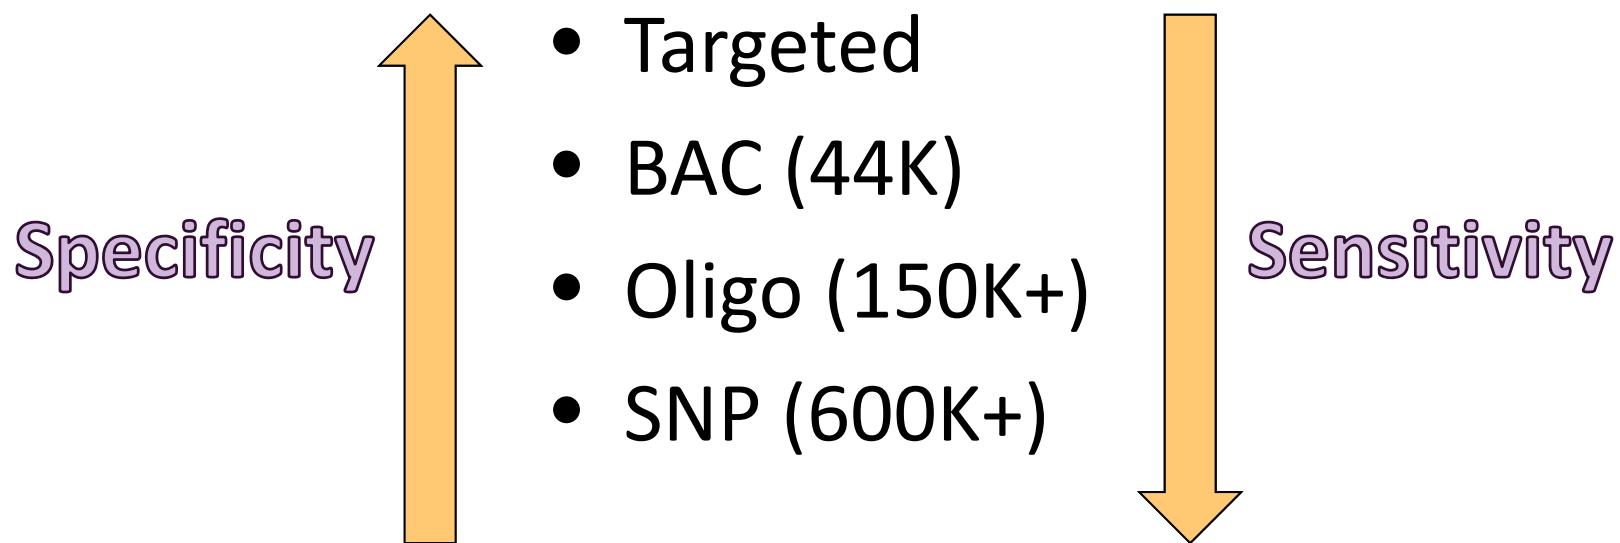

Cytogenomic Microarray

- CMA
 - Cytogenetic Microarray Analysis
- aCGH
 - Array Comparative Genome Hybridization
- Variety of proprietary names
 - Affy, Nimblegen, Roche, etc.
 - Generally identifying the company making the physical hardware

Cytogenomic Microarray

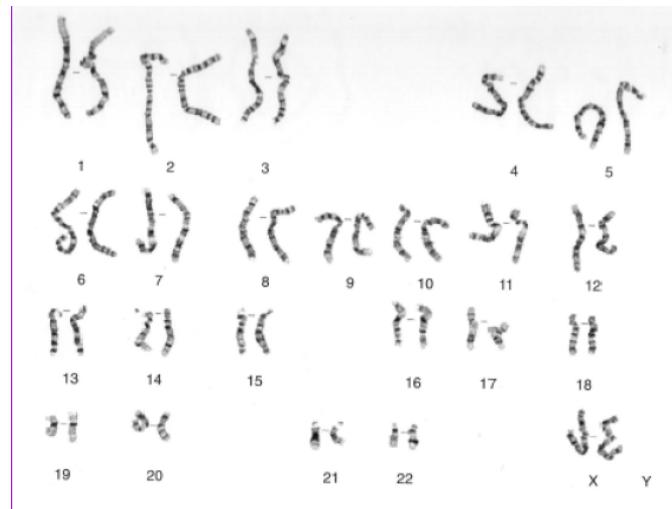

- What it will tell you
 - Submicroscopic additions and deletions
 - Like doing FISH on 200,000 (or more) places
 - SNP arrays will tell about chromosome inheritance
- What it won't tell you
 - Single gene mutations
 - Balanced translocations

Cytogenomic Microarray

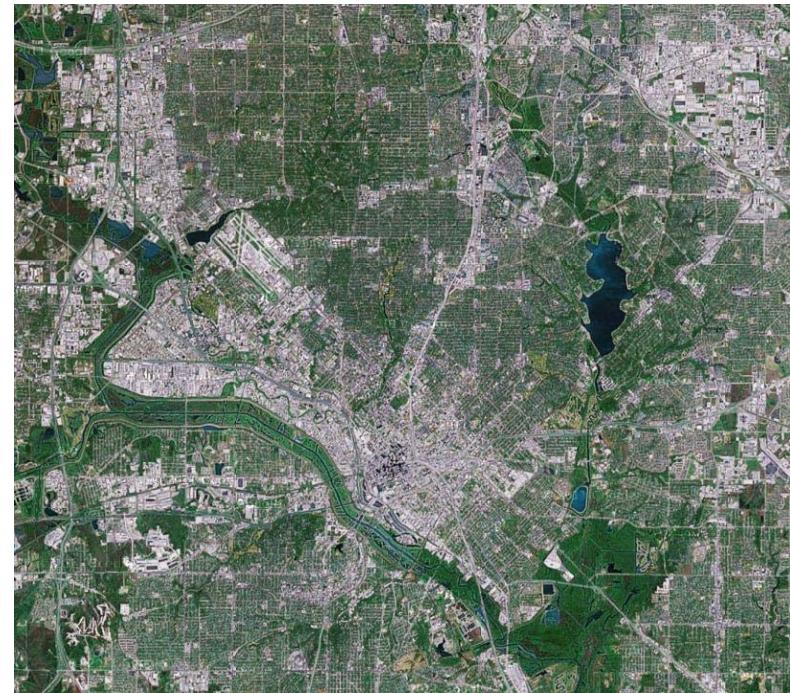

Airplane Analogy

Looking at the genetic material like this

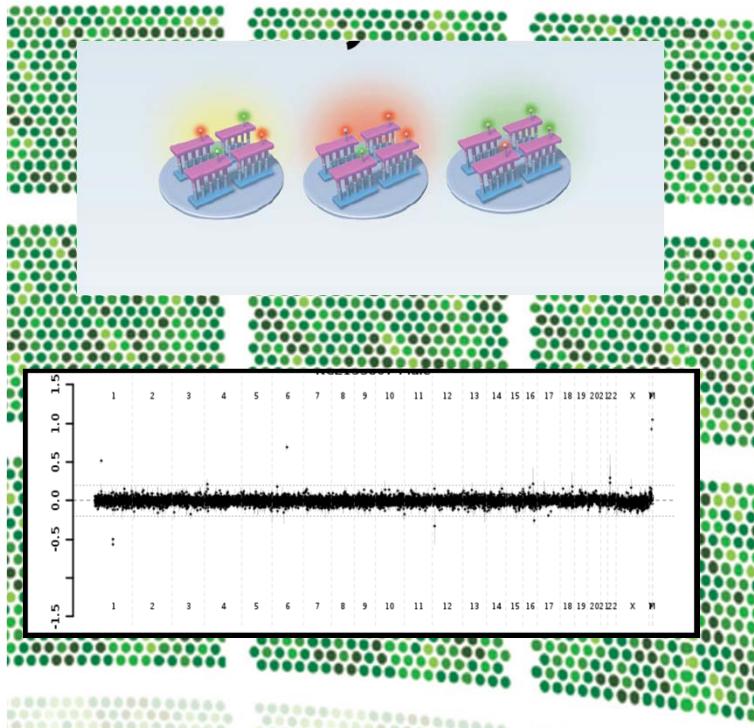

Looking at a city like this

=

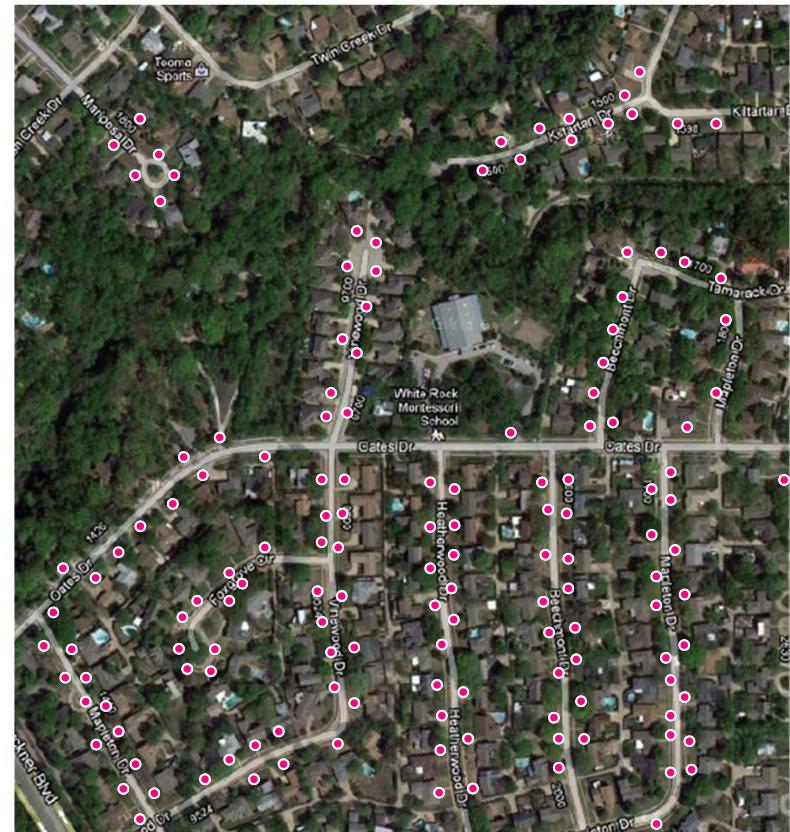

Mailman

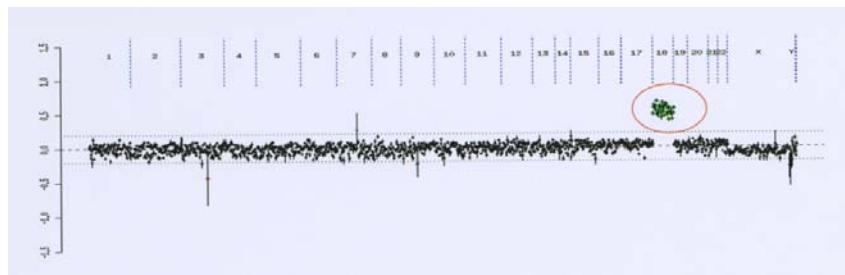

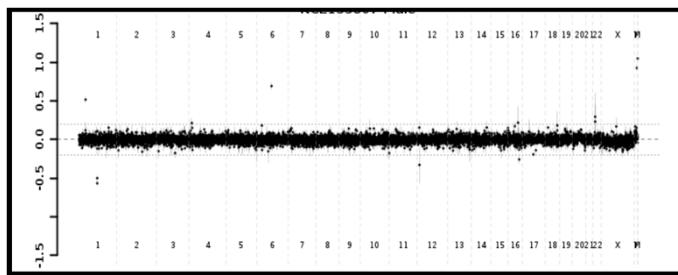

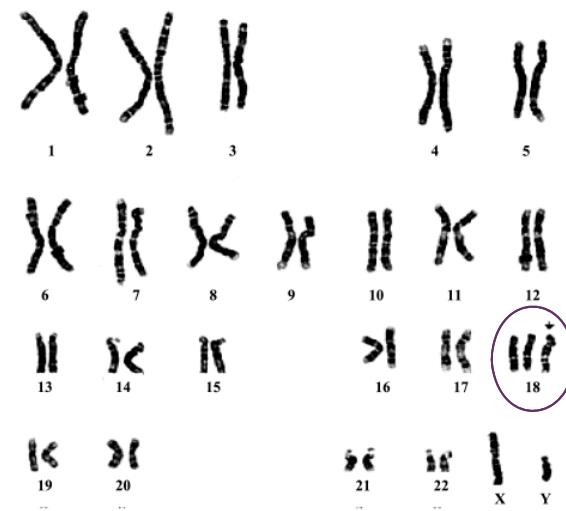

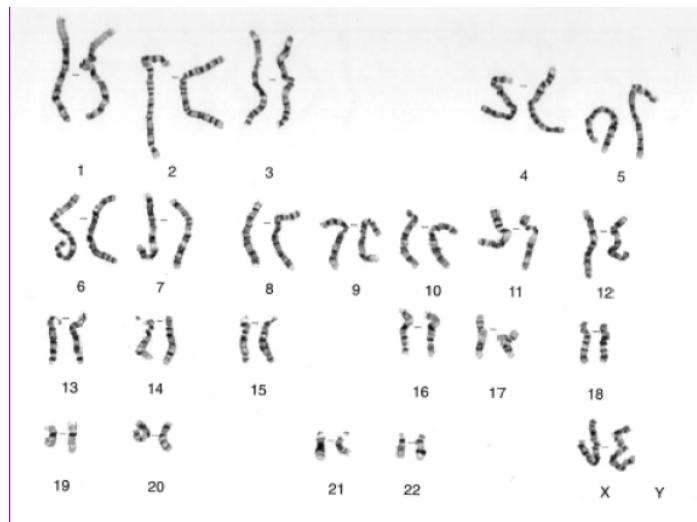

Doing aCGH

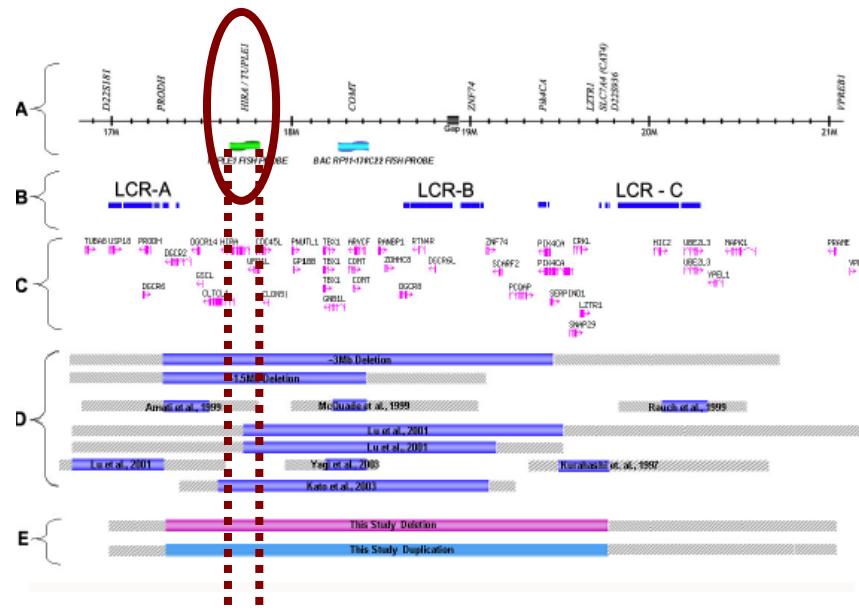

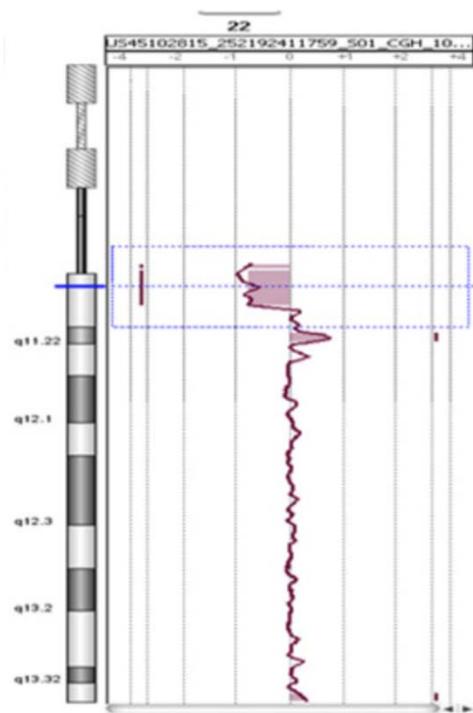

Knowing what mailboxes have
mail in them

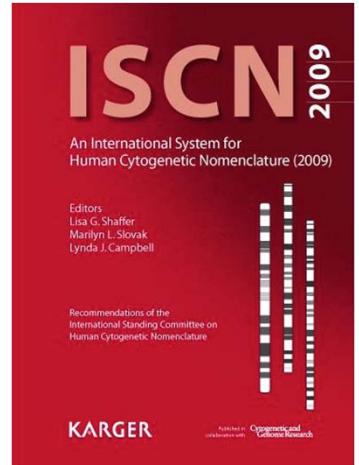

Array

Deletion 22q11.21

Nomenclature

Indication	Abbreviation(s)
FISH was done	ish
Microarray was done	arr
Extra of something	“+”, “x”, add, dup, mar
Something missing	“-”, del, r
Rearrangement	der, ins, inv, rob, t

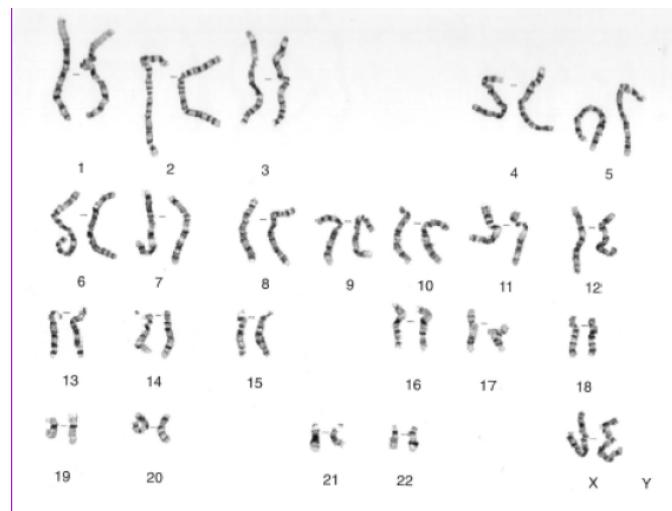

Normal v Abnormal

Technology	Normal Result	Abnormal Result
Routine Karyotype	46,XX or 46,XY	46,XX,del(22)(q11.2)
FISH	46,XY,ish(22)(q11.2)	46,XY,ish del (22)(q11.2q11.2)
Microarray	Arr (1-22,X)x2	Arr (22)(q11.21q11.21)x1

One Last Analogy

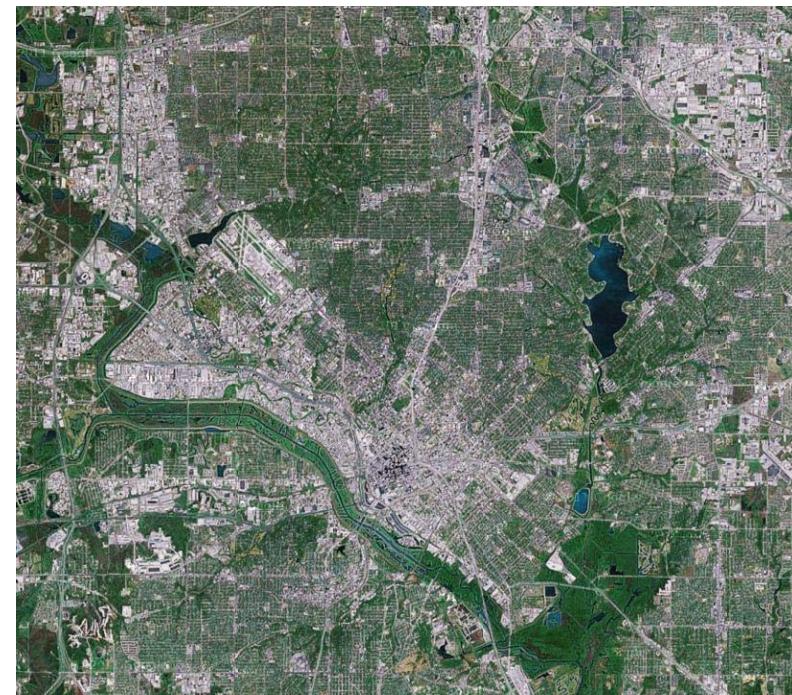

Airplane Analogy

Looking at the genetic material like this

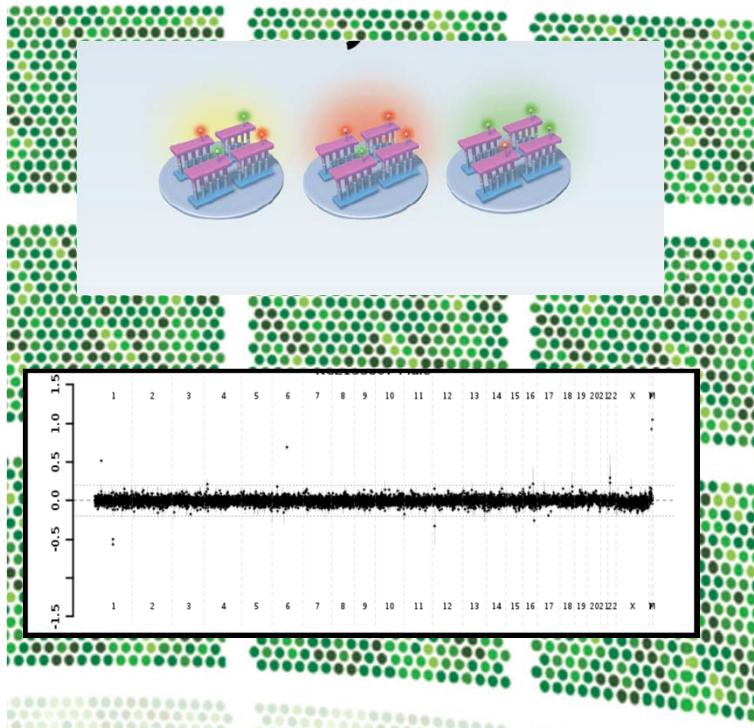

Looking at a city like this

=

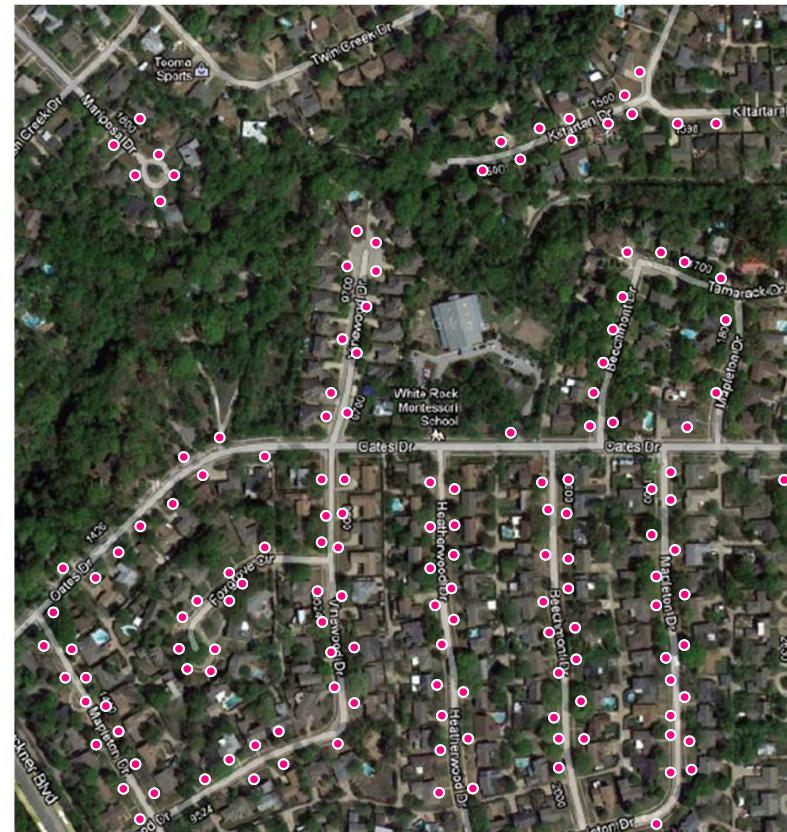

Mailman

Doing aCGH

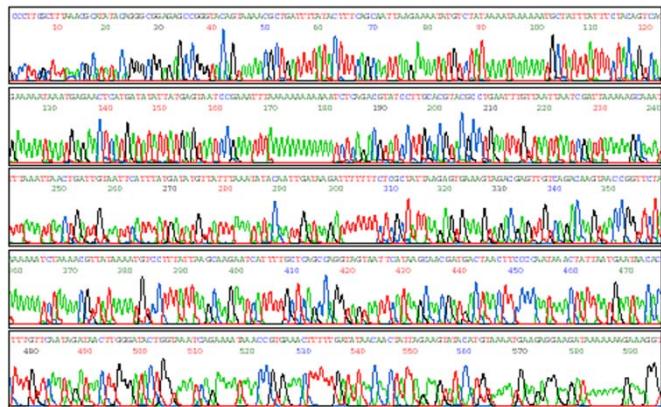

Knowing what mailboxes have
mail in them

Water Bill

Looking for a mutation
in a single gene

Is like seeing how much I owe
on my water bill
