### Preface

### Chapter 1: Establishing and Maintaining a Birth Defects Surveillance Program

|                                                                              |     |
|------------------------------------------------------------------------------|-----|
| 1.0 Introduction.....                                                        | 1-1 |
| 1.1 Identifying Birth Defects Surveillance Program Goals and Objectives..... | 1-1 |
| 1.2 Defining the Boundaries of Legal Authority.....                          | 1-2 |
| 1.3 Developing Birth Defects Surveillance Methods.....                       | 1-3 |
| 1.4 Developing the Birth Defects Surveillance Database.....                  | 1-3 |
| 1.4.1 Standardized Data Fields.....                                          | 1-4 |
| 1.4.2 Capacity for System Modifications and Updates.....                     | 1-4 |
| 1.4.3 Capacity to Monitor Transactions and Interactions.....                 | 1-4 |
| 1.4.4 Record Linkage.....                                                    | 1-5 |
| 1.4.5 Programmatic Data Management Functions.....                            | 1-5 |
| 1.5 Operational Areas for Birth Defects Surveillance Programs.....           | 1-5 |
| 1.5.1 Train Birth Defects Surveillance Program Staff.....                    | 1-6 |
| 1.5.2 Conduct Quality Assurances.....                                        | 1-6 |
| 1.6 References.....                                                          | 1-7 |

### Chapter 2: Case Definitions

|                                                              |     |
|--------------------------------------------------------------|-----|
| 2.0 Introduction.....                                        | 2-1 |
| 2.1 Programmatic Case Inclusion Criteria.....                | 2-1 |
| 2.1.1 Geographic Catchment Area.....                         | 2-1 |
| 2.1.2 Residency Status.....                                  | 2-2 |
| 2.1.3 Pregnancy Outcome.....                                 | 2-4 |
| 2.1.4 Gestational Age.....                                   | 2-4 |
| 2.1.5 Age-at-Diagnosis.....                                  | 2-5 |
| 2.2 Birth Defect Case Definition Criteria and Certainty..... | 2-6 |
| 2.2.1 Selecting Birth Defects for Surveillance.....          | 2-6 |
| 2.2.2 Certainty of the Birth Defect Descriptions.....        | 2-7 |
| 2.3 References.....                                          | 2-8 |

## Chapter 3: Data Elements

|                                                              |     |
|--------------------------------------------------------------|-----|
| 3.0 Introduction.....                                        | 3-1 |
| 3.1 Set of Data Elements for Birth Defects Surveillance..... | 3-1 |
| 3.1.1 Criteria to Consider in Data Element Selection.....    | 3-2 |
| 3.1.2 Additional Data Elements.....                          | 3-3 |
| 3.2 Data Element Logic Checks for Quality Assurance.....     | 3-3 |
| 3.3 References.....                                          | 3-5 |

## Chapter 4: Health Information Classification Systems and Coding

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| 4.0 Introduction.....                                                                                        | 4-1 |
| 4.1 Major Health Information Classification Systems for Coding Birth Defects.....                            | 4-2 |
| 4.1.1 Classification and Coding Systems for Diagnoses.....                                                   | 4-2 |
| 4.1.2 Classification and Coding Systems for Terminology.....                                                 | 4-3 |
| 4.1.3 Classification and Coding Systems for Procedures and Test Results.....                                 | 4-3 |
| 4.2 Use of Coding Systems by Birth Defects Surveillance Programs.....                                        | 4-3 |
| 4.2.1 Considerations Related to Birth Defect Codes.....                                                      | 4-3 |
| 4.2.2 Responding to Changes in Classification and Coding Systems.....                                        | 4-4 |
| 4.2.3 Managing Birth Defect Diagnosis Codes from Different<br>Health Information Classification Systems..... | 4-5 |
| 4.3 References.....                                                                                          | 4-8 |

## Chapter 5: Case Ascertainment Methods

|                                                          |      |
|----------------------------------------------------------|------|
| 5.0 Introduction.....                                    | 5-1  |
| 5.1 Case Identification.....                             | 5-2  |
| 5.1.1 Case Identification Data Sources.....              | 5-3  |
| 5.1.2 Criteria and Triggers for Case Identification..... | 5-5  |
| 5.1.3 Mechanisms for Receiving Case Notification.....    | 5-5  |
| 5.2 Case Investigation.....                              | 5-7  |
| 5.2.1 Data Collection Sources.....                       | 5-7  |
| 5.2.2 Record Consolidation.....                          | 5-7  |
| 5.2.3 Medical Record Abstraction.....                    | 5-9  |
| 5.3 Case Verification.....                               | 5-10 |
| 5.3.1 Completeness of Data Elements.....                 | 5-10 |
| 5.3.2 Accepting or Assigning Birth Defect Codes.....     | 5-10 |
| 5.3.3 Assigning the Most Specific Code Possible.....     | 5-12 |
| 5.3.4 Accuracy of Data.....                              | 5-13 |
| 5.4 Case Inclusion Review.....                           | 5-14 |
| 5.5 References.....                                      | 5-15 |

## **Appendices**

### **Chapter 1: Establishing and Maintaining a Birth Defects Surveillance Program**

Appendix 1A: Examples of Authorizing Language for Birth Defects Surveillance..... 1A-1

Appendix 1B: Summary of Key Protocols and Policies for Birth Defects Surveillance.... 1B-1

### **Chapter 2: Case Definitions**

Appendix 2A: NBDPN Birth Defects Case Definition Criteria Descriptions..... 2A-1

### **Chapter 3: Data Elements**

Appendix 3A: Data Elements for Population-Based Birth Defects Surveillance..... 3A-1

Appendix 3B: Considerations for Data Elements..... 3B-1

### **Chapter 4: Health Information Classification Systems and Coding**

Appendix 4A: Common Health Information Classification and  
Coding Systems in Birth Defects Surveillance..... 4A-1

### **Chapter 5: Case Ascertainment**

Appendix 5A: Data and Information Sources for Case Ascertainment..... 5A-1

Appendix 5B: Criteria for Evaluating a Data or Information Source..... 5B-1

## **At a Glance**

**NBDPN Birth Defects Surveillance Program Activities at a Glance**

**NBDPN Recommendations at a Glance**

**NBDPN Standards at a Glance**
